PROFESSIONAL SUMMARY

Software Developer and Computer Engineering student at Politecnico di Torino focusing on AI system integration and end-to-end software development. Proven experience coordinating software architectures and developing scalable web/mobile applications. Results-driven problem solver skilled in translating business requirements into automated, production-ready technical solutions.

TECHNICAL SKILLS

Languages:	Python, C, CSS, HTML, JavaScript, MATLAB
Frameworks & Tools:	Flask, Render, RESTful APIs, JSON, Git, GitHub, Microsoft Office
AI & Automation:	OpenAI API, AI-assisted coding, Prompt Engineering, Telegram Bot API
Methodologies:	Agile/Scrum, Software Development Life Cycle (SDLC), Project Coordination
Spoken Languages:	Portuguese (Native), English (Fluent / C1 – TOEFL 98), Italian (Fluent / C1), Spanish (Beginner / A1)

EXPERIENCE & SOFTWARE PROJECTS

Full-Stack Developer & AI Integrator

Aug 2026 – Present

Viare (Independent Project) | Italy

- Developed and deployed an automated Telegram bot for language learning, delivering real-time grammar corrections and explanations via direct messages (DM) by integrating the OpenAI API (GPT-4o-mini) with a Python and Flask backend.
- Built an autonomous daily educational challenge generator featuring concurrent multithreading, probabilistic level balancing (A1–B1), and JSON-based state management to prevent content repetition.
- Managed web infrastructure and deployment on Render, structuring custom campaigns and discount codes for a network of 90 potential affiliate partners while configuring analytics tracking metrics.

Technical Project Coordinator

Nov 2024 – Present

Team DIANA - Politecnico di Torino | Turin, Italy

- Coordinated organizational workflows and milestones for the software engineering team building space exploration rovers, ensuring strict compliance with international competition standards.
- Streamlined communication across development sub-teams and managed sprint workflows, overseeing GitHub repository organization to eliminate bottlenecks during field testing.

Mobile App Developer

Feb 2021 – Apr 2022

Kite AHSD & Personal Projects | Brazil

- Engineered "Anti-Distracton" web application and browser extension (Manifest V3) for real-time audio and subtitle monitoring during meetings and lectures (Meet, Teams, Zoom, YouTube), featuring instant sensory alerts (Web Audio API, TTS).
- Co-founded digital platform "Kite" for the neurodivergent community, architecting the frontend in Vanilla JavaScript (ES6+), implementing in-browser mathematical sound synthesis, and delivering an accessible UI at launch.

Data & Operations Lead

Aug 2021 – Feb 2023

LALA & Construindo o Futuro | Remote

- Optimized data workflows for international leadership bootcamps, standardizing cross-border data collection across globally distributed teams to eliminate operational friction.
- Directed operational execution for socio-environmental impact initiatives across 4 global hubs, consistently meeting all delivery deadlines through agile coordination of multidisciplinary teams.

EDUCATION

Bachelor of Science in Computer Engineering

Sep 2024 – Present

Politecnico di Torino | Turin, Italy

Engineering Summer Program

Jul 2022

University of Michigan | United States

HONORS & CERTIFICATIONS

- Cloud Digital Leader (CDL) | Google
 - Generative AI for Developers | Google
- Women in Engineering Award | University of Brasília (2021)
 - Scholarship Award | Society of Women Engineers
 - Gold Medal | Brazilian Astronomy Olympiad (OBA) (2022)
